

Wiring method for fiber optic terminal box

Overview

Learn how to install a fiber optic termination box step-by-step for FTTH projects. Covers mounting, splicing, routing, labeling, and testing for indoor/outdoor use. The box is light and compact, especially suitable for protective connection of fiber cables and pigtails in FTTH. It functions as a junction between the incoming fiber cable and the outgoing customer-side fiber cable, where one fiber can be spliced, patched. Proper installation and maintenance of FTBs are essential to ensure the reliability and performance of the network infrastructure.
