

Yellow light on the distribution box

Overview

Standard procedure to locate the problem is to try switching off some breakers to see where is the failure. Notice that your device is RCD residual current device (30mA) plus a 16A circuit breaker. It's basically a special kind of circuit breaker that can detect arcs/sparking/leakage between hot and ground/neutral that otherwise wouldn't be enough to trip a normal breaker by amperage alone. On it it has a rating of 200, does that mean Is my home at risk of a fire?

No, not at all. What are the green, yellow, and red LED indicators on the Micrologic trip units of PowerPacT H, J, and L frame circuit breakers?

Purpose of the green (ready), orange (>95) and red (>105) indicators on H, J and L breaker trip units Circuit Breaker When the green LED is flashing, the electronic trip. Every home relies on a breaker box (also called a service panel or distribution board) to manage and protect its electrical circuits.
